

Combo 285 BD

Liquid Bulk Container

This food grade virgin PP square-shaped foldable 1000-liter container the ideal container for low and high viscosity liquid products in industries such as food processing, cosmetics and pharmaceuticals. Liquid products are kept safe with a sealable lid and its aluminum reinforced side panels are designed to hold liquid while residual product is minimized with the bottom discharge. Additionally, the container's high folding ratio saves space in storage and in transit, resulting in reduced costs and a smaller carbon footprint. Its five runners allow the container to be used 2-ways in rack and 2 ways on a conveyor belt. Talk to sales about the tools we have available for filling, sealing and emptying.

Hygienic

Plastic containers are non-porous and resistant to moisture, insects, fungi, acids, fats, solvents and odor. Our containers are inspected after every turn to make sure they meet our quality standards.

Sustainable

Plastic containers are a sustainable solution because they can be reused for years, get recycled at the end of their service life and are then remanufactured into new containers.

Built for Automation

Because plastic containers are molded, the sizes and weight are always consistent, causing zero disturbances in your automated material handling systems. Unfolding and folding can be done by only one operator.

Features and specifications

Characteristics

Colour	Grey/Black
Lid	Included
Runners	5
Drop door	No
Material	PP
Foodgrade	Yes
ISPM-15 proof	Yes
Temperature range	-20°C/+45°C
Bottom Discharge	Yes

Dimensions

External	1155 x 1155 x 1132 mm
Internal	1065 x 1045 x 940 mm
Folded	1155 x 1155 x 467 mm
Weight	85,5 kg
Volume	1060 l

Loading capacity

Max static load	7442 kg
Max dynamic load	2977 kg
Max in rack load	1400 kg

Loading quantities

Units per trailer	110 units
Stack	5 units
