

L1

Euro size food grade pallet

The L1 pallet, a **food-grade virgin Euro-sized PE** pallet, has a robust, consistent design which is an **exact copy of an EPAL wooden pallet's dimensions**. Its high durability and **three closed runners** at the bottom offer optimal support. A corrosion-resistant, **anti-slip coating** on the top deck reliably secures the pallet load and the L1 is compatible with automated systems. These pallets are equipped with **RFID technology** so they can be tracked and traced.

Durable

Plastic pallets have a stable and robust structure and can be easily cleaned and repaired. Depending on the hygiene needs, our pallets can be washed and inspected to ensure they meet your high-quality standards.

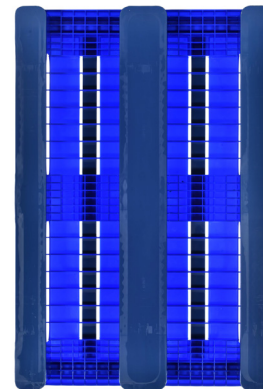

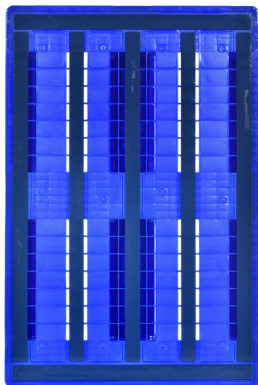

Sustainable

Plastic pallets are a sustainable solution because they can be reused for years and at the end of their service life, can be recycled.

Efficient

Plastic pallets are compliant with automated systems as the sizes and weights are always consistent. Replenishment times are also reduced and they save more space when being stored or in transit.

Features and specifications

Characteristics

Colour	Blue
Runners	3
Rims	No
Anti-slip	Yes
Metal re-inforced	Yes
Material	PE
Foodgrade	Yes
ISPM-15 proof	Yes
RFID	Yes
Temperature range	-30° C to 40° C, briefly up to +90 °C

Dimensions

External	1200 x 800 x 150 mm
Weight	20 kg

Loading capacity

Max static load	7500 kg
Max dynamic load	1250 kg
Max in rack load	1250 kg

Loading quantities

Units per trailer	528 units
Stack	16 units
