

The Smarter Way to Ship

This reusable, foldable plastic bin efficiently ships product through the supply chain. Its light-but-strong polymer construction and foldable stackable design lowers transportation costs and saves on storage space.

Smarter Design

Lighter weight means lower fuel consumption while foldable and stackable design requires less storage space.

Prevents Damage

Durable plastic bins with solid walls and foot design provide superior protection for product inside and reduce damage.

Sustainable

Durable plastic bins are reusable for years, and recyclable.

Features and specifications

Durable and Lightweight Construction

Lighter but stronger injection-molded construction lowers transportation costs

Reusable

Eliminates packaging waste

Solid Foot Design

Reduces the need for repairs

Easy to Clean

Doesn't hold on to moisture and odors

Foldable and Stackable

Easy to store when empty, stack securely with greater integrity

Ergonomic Handles

Eliminate dangerous and awkward pallet handling

General Purpose Bin

Height	45 in
Length	48 in
Width	40 in
Folded Height	12.25 in
Weight	105 lbs
Load capacity	2000 lbs
53' trailer quantity	270 containers
Static load rating	7200 lbs
Dynamic load rating	2400 lbs
